

**Sewer Rates
User Charge System
Effective 4/1/2020**

Sewer charges are based on water consumption with rates charged for each 1,000 gallons.

The following is the sewer service charge schedule effective April 1, 2020:

Monthly Base Rate	Based on Water Meter Sizes (as shown below)
Volume Charge	\$1.30 per 1000 gallons of water usage

Monthly Base Rate is based on water meter sizes as follows:

<u>Water Meter Size</u>	<u>Monthly Base Rate</u>	<u>Sewer Rate Codes</u>
Less than 1 inch & 1 inch	\$19.00	SW01, SW01-M
1 ½ inch	\$22.00	SW02, SW02M,
2 inch	\$22.00	SW03, SW03M, SW06, SW08, SW12
3 inch	\$22.00	SW04, SW06A
4 inch	\$26.00	SW06B

For those users of the municipal wastewater system contributing wastewater, the strength of which is greater than the normal domestic sewage, a daily surcharge will be levied and collected in addition to the regular charge. This surcharge is to offset higher-than normal operation, maintenance, and replacement costs associated with the higher-than-normal sewage strength.

The following surcharge is effective April 1, 2009:

Excess BOD surcharge of \$0.17 per pound of BOD in excess of 3.33 lbs. per 1000 gallons

Excess S.S. surcharge of \$0.17 per pound of BOD in excess of 3.33 lbs. per 1000 gallons

Customers with a non-metered Sewer connection only, fee will be \$26.80 per month based on an average usage of 6,000 gallons. [SW01A, SW01AM]

PILOT Fee:

In addition to the charge based on monthly rates as computed above, the total monthly bill for service is subject to the applicable PILOT Fee. See Schedule A for current PILOT Fee rates.
