Fax 660-646-4181

Dear CMU Customer:

In compliance with a new ruling from the E.P.A. and Missouri Department of Natural Resources, the Chillicothe Municipal Utilities Water Department must identify **every water service line (LEAD, COPPER, Etc.)** in Chillicothe that was put in **Before 1990**. We are asking our customers for help in the identification of the water service line where it enters the house. If you are unable to identify or access the water line, please call (660) 646-0562, and a crew will be scheduled to help identify it for you. If the water service type cannot be determined, or if we receive no response from the customer, CMU crews may need to excavate the water line approximately three feet from the meter.

Thank You.

Chris Bonderer

Water Systems Superintendent
